

AI HEALTHCARE & BENEFITS ADVOCACY FOR YOUR WORKFORCE

FOR ORGANIZATIONS

Benefits confusion, denied claims, and surprise bills quietly drain your people's time, money, and health.

Healthvocate puts an AI advocate in every member's corner — drafting appeals, auditing bills, and optimizing coverage. You deploy it across your population; each person reviews and digitally signs every outbound action and stays in control of their own data.

Built for employers · benefits brokers · HR & benefits teams · patient-advocacy organizations

EVERY SEAT INCLUDES ALL NINE TOOLS

FEATURE 01

Benefits Eligibility Scanner

Screens each member's income, household, age, and location against federal & state programs — Medicaid, SNAP, housing, utility help. Drafts the application; they review and sign.

FEATURE 02

Social Security Optimizer

Models every claiming scenario against earnings record, household, and health to find the strategy projected to maximize lifetime payout.

FEATURE 03

Medicare Plan Optimizer

Compares plans in the member's ZIP against their real prescriptions, doctors, and usage — re-checked every Open Enrollment so no one drifts into a worse plan.

FEATURE 04

Prior Authorization Letters

Drafts appeals to denied authorizations from vetted templates plus the member's history, with policy and clinical citations. Sent only on their signature.

FEATURE 05

Prescription Optimizer

Compares Cost Plus Drugs' pricing for every medication, plus manufacturer assistance and therapeutic alternatives to discuss with a prescriber.

FEATURE 06

Medical Bill Auditor

Reads EOBs and itemized bills; flags duplicate charges, upcoding, and out-of-network surprises that may violate the No Surprises Act. Drafts the dispute.

FEATURE 07

Medical Records

Generates a clean one-page visit summary — active conditions, medications, recent activity, emergency contacts — for any appointment.

FEATURE 08

Medical Concierge

Searches the national provider directory by specialty and location, each result screened against the HHS-OIG exclusion list — a filter most directories skip.

FEATURE 09

Equipment Lookup

Comparison-shops CPAPs, glucose monitors, mobility and hearing aids across major sellers; flags sale prices and links to each listing.

PER-SEAT VOLUME PRICING

\$30
per seat / mo
list (1-99 seats)

\$25.50
100+ seats
15% volume discount

\$24.30
1,000+ seats
19% volume discount

\$22.50
100,000+ seats
25% volume discount

Whole-account pricing — every seat bills at the same rate, scaling from 15% to 25% as you grow. Billed monthly per seat; cancel anytime. Set it up yourself in minutes — no sales call required. Full tier table and a live calculator at healthvocate.com/enterprise.

HOW ROLLOUT WORKS

1

Create Your Team

Name your organization, choose seats, and pay per seat. You become the team owner.

2

Invite Your People

Add members by email. Each gets a private invitation to claim their seat.

3

Members Get Full Access

All nine tools, with every outbound action reviewed and e-signed by the member.

4

Manage Anytime

Add or remove seats, track usage, and handle billing from your team dashboard.

Healthvocate for Teams — every seat includes all nine tools. We never sell or share member health data for advertising.
